

Fund Objective

The Fund aims to generate a return in excess of returns on investment in short term bank deposits. Moreover, the fund seeks maximum current income and price appreciation consistent with preservation of capital and low total return volatility.

Investment Strategy

The fund is a total return bond portfolio that primarily invests in debt issues of entities in GCC countries. Debt issues of entities incorporated outside GCC countries may be included on opportunistic basis.

All sectors of the bond market will be utilized to add value including:

- Debt instruments issued by governments and government agencies
- Debt instruments issued by corporates and financial institutions
- Asset backed securities
- Shari'ah compliant debt and money market instruments
- Conventional money market instruments
- The fund may also invest in third party funds or structured instruments and vehicles
